

ENERGY POLICY

It is ÇİMTAŞ's goal to apply the Energy Management System in its all operations, based on a preventive approach and to improve the system in line with its mission, vision and values to ensure the **“Using Energy Efficiently”**

In this context, ÇİMTAŞ's committed to:

- Fulfill the standard requirements of the Energy Management System;
- Provide the necessary information and resources;
- Determine and review of energy goals and objectives;
- Comply with applicable legal or other requirements;
- Support the procurement of energy-efficient products and services for the improvement of energy performance and designs aimed at improving energy performance;
- Ensure that the Energy Management System is clear and applicable at all levels and is continuous improved, while increasing energy efficiency and performance.
